

Anti-HSV1 antibody

Cat # NB-22-52923-1 size: 1 ml

Description

Rabbit polyclonal antibody anti-Herpes Simplex Virus I is suitable for use in Immunohistochemistry research applications.

Product Information

Host:	Rabbit
Applications:	Immunohistology - Paraffin
Reactivity:	Human
Clonality:	Polyclonal
Conjugation:	Unconjugated
Formulation:	Tris Buffer, pH 7.3-7.7, containing 1% BSA and <0.1% Sodium Azide.
Dilution Range:	IHC 1:100-1:500
Storage Instruction:	Store at 2-8°C upon receipt.

Additional information

Background: Herpes simplex virus is quite ubiquitous and is quite variable in its presentation in human disease. Type I usually infects the non-genital mucosal surfaces. It may affect the skin or internal organs (typically brain, lung, liver, adrenal gland, or GI tract) of immunocompromised individuals. This polyclonal antibody reacts with Type I Herpes viruses. There may be cross-reactivity with varicella zoster virus at higher concentrations. Cross-reactivity with CMV or Epstein-Barr virus is not seen with this antibody.
