

## DAGL $\beta$ antibody

#Cat: NB-19-0015      Size: 0,1ml

### Immunogen Data

**Description:** DAGL $\beta$  (diacylglycerol lipase  $\beta$ ) is a phosphodiesterase that belongs to the metallo-lactamase family. It catalyzes the hydrolysis of diacylglycerol (DAG) to 2 arachidonoylglycerol (2-AG), the most abundant endocannabinoid in the brain. It is required for axonal growth during development and for retrograde synaptic signaling at mature synapses.

**Immunogen:** Synthetic peptide (SSDSPLDSPTKYPTLC), corresponding to an internal sequence of rat/mouse DAGL $\beta$ .

**Alternative names:** RGD1310193 or KCCR13L.

**UniProt ID:** P0C1S9.

**Mol. Weight:** 76 kD.

### Antibody Data

**Host:** Rabbit

**Clonality:** Polyclonal

**Species Reactivity:** rat, mouse and human.

**Concentration:** 0.45 mg/ml

**Volume:** 100  $\mu$ l

**Purity:** affinity purified.

**Storage Buffer:** PBS 1X, sodium azide 0.05%, BSA 1 mg/ml and glycerol 50%.

**Storage Instruction:** Aliquot and store at -20°C or -80°C. Avoid freeze-thaw cycles.

### Tested applications

DAGL $\beta$  antibody is recommended for detection of DAGL $\beta$  of mouse, rat and human origin by Western Blotting (starting dilution 1/100, dilution range 1/100-1/500) and immunohistochemistry (starting dilution 1/100, dilution range 1/50-1/500); non cross-reactive with DAGL $\alpha$ .

### Recommended Dilutions:

**WB:** 1/100-1/500

**IHC/IF:** 1/50-1/500

1. Immunohistochemical detection of DAGL $\beta$  using NB-19-0015 on formaldehyde fixed rat ependyma slices. Antigen retrieval: 30 min incubation at 80°C in 50 mM sodium citrate pH 9. 10% donkey serum as blocking agent for 1 hour. Primary antibody dilution 1/50, overnight. Secondary antibody: anti-rabbit biotin-conjugated IgG (1/500) (Suárez et al., 2010)

2. Immunoblot of DAGL $\beta$  by using antibody (NB-19-0015) at 1/100 in 40  $\mu$ g of rat brain membranes, developed using the ECL technique.
