

NeoFBS Fetal Bovine Serum

#Cat: NB-58-0004B	Size: 100ml
#Cat: NB-58-0004A	Size: 500ml
#Cat: NB-58-0035B	Size: 100ml
#Cat: NB-58-0035A	Size: 500ml
#Cat: NB-58-0036B	Size: 100ml
#Cat: NB-58-0036A	Size: 500ml

General Information

For decades, NeoFBS fetal bovine serum has been an established additive in cell culture media. Its unique growth-promoting properties make it a valuable and essential ingredient for the cultivation of a wide variety of cell types. Fetal Bovin Serum is a complex mixture of proteins, growth factors, and many other components. It has not yet been possible to produce a synthetical growth additive with comparable performance.

Growing demand of serum with limited availability poses numerous animal welfare issues. With an increasing awareness on this problem, many researchers state that they would like to use less serum – without sacrificing performance.

In collaboration with the University of Applied Science Frankfurt, Neo Biotech developed an alternative to traditional Fetal Bovin Serum that is more controlled, defined, and less susceptible to the issues of serum supply.

NeoFBS incorporates the key components for optimal cell growth making it possible to significantly reduce the serum content. The combination of these identified components and a lower serum concentration shows a positive influence on cell growth, morphology, and furthermore decreases cell stress while batch-to-batch variations are reduced to a minimum. NeoFBS is supplemented to cell culture media in the same concentration as your standard Fetal Bovin Serum (e.g., 90% medium with 10% Fetal Bovin Serum).

Product	Origin	Volume	Cat. No.
NeoFBS , Fetal Bovine Serum	Collected in South America	100 ml	NB-58-0004B
		500 ml	NB-58-0004A
NeoFBS, Fetal Bovine Serum	Origin USA	100 ml	NB-58-0035B
		500 ml	NB-58-0035A
NeoFBS, Fetal Bovine Serum	Origin Australia	100 ml	NB-58-0036B
		500 ml	NB-58-0036A

Product Specifications

Appearance	Clear amber liquid
Storage and shelf life	Store at ≤ -15 °C. Avoid repeated freeze-thaw cycles. Preparation of aliquots recommended. Once opened, store at 4 °C and use within 4 – 6 weeks. Do not heat inactivate!
Shipping conditions	Frozen (dry ice)
Thawing	Overnight at +2 °C to +8 °C. Swirl gently to homogenize.

Quality Control

The quality of our products starts with the sourcing of raw material, which is only purchased from qualified suppliers and subjected to strict quality controls. After manufacture, the product undergoes extensive testing and only batches that meet all quality criteria are released for sale. Standard tests include pH, osmolality, total protein, albumin, IgG, hemoglobin, endotoxin content, sterility, mycoplasma, virus testing, and cell culture performance.

Precautions and Disclaimer

This product is for research use only. Please consult the Material Safety Data Sheet (MSDS) for information regarding hazards and safe handling practices.

Help Needed?

If you have any further questions regarding this product, please do not hesitate to contact our cell culture experts by email (info@neo-biotech.com) or phone (+33977400909).
